Extent of Disease (EOD) 2018 Consolidation Manual

Effective with Cases Diagnosed 1/1/2018 and Forward

Published December 2021

The content of this manual was developed by the EOD Consolidation Workgroup. NCI SEER gratefully acknowledges their dedication and valuable contributions.

Introduction

Extent of Disease (EOD) 2018 (applicable for cases diagnosed 2018+) is a data collection system that describes how far a cancer has spread at the time of diagnosis and is based on the AJCC 8th Edition Staging Manual. EOD 2018 uses three core data items: EOD Primary Tumor (PT) [#772], EOD Regional Nodes (RN) [#774], and EOD Mets (M) [#776].

EOD 2018 is applicable to every primary site/histology combination, including lymphomas and leukemias. The three EOD core data items are used to derive EOD TNM 8th T [#785], EOD TNM 8th N [#815], EOD TNM 8th M [#795], EOD TNM 8th Stage Group [#818] and Derived Summary Stage 2018 [#762]. For some schemas, additional data items are also needed. For more information on assigning individual EOD codes, please see the Extent of Disease 2018 Manual. The EOD 2018 schemas, valid values, definitions and registrar notes are provided in SEER*RSA.

Data Item Consolidation

Central cancer registries may receive data on a single patient from multiple sources. Central registry staff must consolidate data from these sources into a single set of data, either by manual (human) decisions or by automatic processes. In general, consolidation decisions can be based on multiple factors, including:

- The priority or weight given to one code over another code
- The reliability of the data source providing the code
- The date of admission on the records

Reliability of Source Data

Accurate data item consolidation, whether by manual or automatic processes, depends greatly on the reliability of the source data. Pre-consolidation processes should be performed by the central registry to ensure that source data are complete and trustworthy. **The purpose of this manual is not to instruct the central registry how to evaluate or validate source data.** This manual should be used after source data have been through your registry's defined quality control processes.

Consolidation of EOD data items should follow the same processes as other data items that your registry consolidates. If your registry routinely takes into account other factors when consolidating data items (like facility type, Class of Case, the frequency of values across all

source records, etc.), then those factors may be considered when consolidating EOD data items as well. The logic contained in this manual is intended to be used as **"base logic"** to which other deciding factors may be added.

EOD Consolidation

The purpose of this manual is to inform the cancer registrar at the central registry how to **manually consolidate** the three core EOD data items for each schema when there are different source values. The consolidation instructions assume that critical data items on the records have already been reviewed and consolidated, including primary site, histology, and behavior.

Pathological vs Clinical Information and Neoadjuvant Therapy

In general, pathological findings take priority over clinical findings. Per the EOD 2018 General Instructions, information for EOD from a surgical resection after neoadjuvant treatment may be used, but ONLY if the extent of disease is greater than the pre-treatment clinical findings (see #5 in the General Guidelines).

For consolidation, this same guideline is to be used. If neoadjuvant therapy was given prior to surgery or lymph node dissection, then the clinical findings should be used (unless the post-therapy findings are more extensive). Neoadjuvant therapy status should be taken into consideration as a mitigating factor when using the EOD 2018 Consolidation logic.

Definitions

Source 1 and Source 2

Source 1 and Source 2 are simply the sources of the code values being consolidated. A source may be a record (path report, abstract, etc.), or it may be the existing consolidated tumor information.

Code Grid (and How to Use it)

In every schema, there is a code grid for each EOD data item-- EOD PT, EOD RN, and EOD M. The code grid contains every code combination possible for source 1 and source 2; the **preferred code** is found in the intersecting cell for that row and column.   For example, an incoming

abstract has a value of 100 for EOD RN, and the existing consolidated data set has a value of 200 for EOD RN. Locate the row for code 100 (source 1) and the column for code 200 (source 2). The intersecting cell contains the preferred code for the consolidated data set (see Code Grid example below). In this situation, use code 300.

Example of a Code Grid (Not real data)
Source 1 and Source 2 represented by the X and Y axes

	000	100	200	300	600	700	800	999
000	000	000/100	000/200	000/300	000/600	000/700	000/800	000/999
100		100	300	300	600	700	100	100
200			200	TR	200/600	700	200	200
300				300	600	700	300	300
600					600	700	600	600
700						700	700	700
800							800	800
999								999

Shading

When a single value is present in a particular cell in the Code Grid with no shading , then the higher code is preferred and no other input is needed.

When a single value is present in a particular cell in the Code Grid with purple shading , then the higher code is *not* preferred, and no other input is needed. The shading alerts the registrar that the preferred code deviates from the more common "take the higher code" approach.

A cell with blue shading indicates that the preferred code is an altogether different value from either of the Source 1 and Source 2 values. This may happen when the definition of an EOD code is additive (for example, Code 300 = Code 100 + Code 200).

At times, additional input is needed to determine the preferred code. These cells contain two codes separated by a slash and are shaded red . In these situations, there are Additional Input Tables that must be consulted in order to determine the preferred code. These

are located immediately after the schema-specific Code Grids. In addition, the values of other data items may need to be taken into consideration in order to choose a value, and a text review **may** be needed.

A cell that contains `TR` indicates that a text review is **required** before a code decision can be made (see Text Review section below).

Additional Input Tables

When a cell is `shaded red` or indicates `TR`, then consult the Additional Input Table immediately following the schema-specific Code Grid. These tables provide instructions on how to determine the preferred code. Other data items may need to be checked, or a text review may be warranted. The color of the Additional Input tables vary by data item:

- EOD Primary Tumor: `Blue`
- EOD Regional Nodes: `Green`
- EOD Mets: `Orange`

The example below corresponds to the example Code Grid above.

Additional Input Table Example (Not real data)

When the Source 1 value is 200:

Source 2 Code(s)	Outcome
600	When Regional LN Pos=01-90, 95, 97, code 200 takes priority. Otherwise, code 600 takes priority.

Text Review (TR)

At times, the code values from Source 1 and Source 2 represent conflicting codes. The Additional Input Table will indicate that a text review of the record is needed to determine which code is most accurate.

After text review, it is possible that a completely different code should be selected than what was originally on the multiple records. For instance, for the schema Melanoma Skin, if one source is coded EOD RN 500 (one clinically occult or detected node with in-transit, satellite, and/or microsatellite metastasis), and another source is coded EOD RN 450 (two or three involved nodes with 1 or greater clinically detected without in-transit, satellite, and/or microsatellite metastasis), it might be appropriate based on the text to code 700 (Two or more clinically occult or detected with in-transit, satellite, and/or microsatellite metastasis).

See below for the Melanoma Skin EOD Regional Nodes Additional Input table which gives instructions for the text review.

Source 2 Code(s)	Outcome
100, 200, 350-450, 550-650, 750	These codes are in conflict. Perform a **text review** to determine whether *in-transit*, *satellite*, and/or *microsatellite metastases* are documented. When documented, and: • No nodes are detected, use code 300 • 1 node is detected, use code 500 • 2+ nodes are detected, use code 700 When not documented or there is no text available, and: • No nodes are detected, use code 000 • 1 node is detected, use codes 100-200, 350 • 2-3 nodes are detected, use codes 400-450, 550 • 4+ nodes are detected, use codes 600-650, 750

While performing the text review, editors should also ensure that associated codes are correct, such as Regional Nodes Positive and Examined, Sentinel Nodes Positive and Examined, the Mets at DX fields, Summary Stage 2018, SSDIs, etc.

If there is no text available or the text does not provide the necessary information to make a consolidation decision, then refer to the instructions provided in the schema. In general, the lower code is the default to align with long-standing guidance to choose lower stage in the absence of complete information. However, the lower code is not appropriate in some situations, so a different default code will be provided in the schema. **Consult the schema to determine how to code EOD when a Text Review does not provide any/enough information.**

Additional Notes

- Refer to the **Appendix** for consolidation logic for code combinations where additional input is not required but the higher code does not take priority (purple and blue shading).
  - Click on the **Jump to Appendix** link in each schema (if applicable) to jump straight to that schema's Appendix section. Click the "Previous View" button in Adobe Reader to return to the schema. This button may need to be enabled on your toolbar. You may also use the shortcut ALT + LEFT ARROW to return to the previous view.
- Nearly all **lower codes** take priority over 800 and 999. Exceptions include:
  - EOD PT codes that are in situ
  - EOD RN codes that indicate no lymph node involvement
- The version of the EOD Consolidation Manual will always align with the current EOD version at time of publication. For this reason, the first version of this manual was v2.0 (and there are no previous versions).

Additional Input Tables

When the Source 1 EOD PT value is 000:

Source 2 Code(s)	Outcome
050	Code 000 when histology = 8130/2 or 8131/2 Code 050 for all other /2 urothelial histologies Code 050 when 8130/2 or 8131/2 are present along with another /2 urothelial histology
100-999	When behavior = 2 (in situ), code 000 takes priority When behavior = 3 (invasive), codes 100-999 take priority

Field dependencies: Histologic Type ICD-O-3 [NAACCR #522], Behavior Code ICD-O-3 [NAACCR #523]

When the Source 1 EOD PT value is 050:

Source 2 Code(s)	Outcome
100-999	When behavior = 2 (in situ), code 050 takes priority When behavior = 3 (invasive), codes 100-999 take priority

Field dependencies: Behavior Code ICD-O-3 [NAACCR #523]

When the Source 1 EOD PT value is 100, 130, 200, 300, 370:

Source 2 Code(s)	Outcome
170, 250, 350, 400	Perform a **text review** to determine whether there is extension to the distal ureter. • When the distal ureter is involved, codes 170, 250, 350, 400 take priority. • When there is no evidence of extension to the distal ureter in the text, or there is no text available, codes 100, 130, 200, 300, 370 take priority (codes without distal ureter).

Higher code is NOT the priority

Text review needed (see Additional Input Tables below)

Code combination results in a different code

Additional Input Tables

When the Source 1 EOD RN value is 030, 050, 070:

Source 2 Code(s)	Outcome
150, 350, 400	When Regional Nodes Positive = 01-90, 95, 97, 98, 99, codes 150, 350, 400 take priority. When Regional Nodes Positive = 00, codes 030, 050, 070 take priority.

Field dependencies: Regional Nodes Positive [NAACCR #820]

When the Source 1 EOD RN value is 200:

Source 2 Code(s)	Outcome
250	Perform a **text review** to determine which nodal region(s) were involved (pathological assessment only). • Axillary (level I and II), ipsilateral: Code 200 takes priority • Internal mammary, ipsilateral: Code 250 takes priority • Both of the above are true: Code 300 takes priority • When there is no text available or the text does not provide the necessary information to make a consolidation decision, use code 200.

When the Source 1 EOD RN value is 100, 200, 250:

Source 2 Code(s)	Outcome
350, 400	When Lymph Node Positive Axillary=01-99, X1, X5, X6, codes 100, 200, 250 take priority When Lymph Node Positive Axillary=00, X9, codes 350, 400 take priority

Field dependencies: Lymph Nodes Positive Axillary Level I-II: [NAACCR #3882]

Additional Input Tables

When the Source 1 EOD PT value is 000:

Source 2 Code(s)	Outcome
050-999	When behavior = 2 (in situ), code 000 takes priority When behavior = 3 (invasive), codes 050-999 take priority

Field dependencies: Behavior Code ICD-O-3 [NAACCR #523]

When the Source 1 EOD PT value is 300:

Source 2 Code(s)	Outcome
400	Perform a **text review** to verify primary site and whether the pericolic/perirectal tissues invaded were peritonealied or non-peritonealized. • When primary site = C180, C184, C187, C199, or upper third of rectum, code 400 takes priority. These sites are entirely peritonealized, so code 300 cannot be used. • When the pathologist does not further describe the "pericolic/perirectal tissues" as either "non-peritonealized pericolic/perirectal tissues" vs "peritonealized pericolic/perirectal tissues" and the gross description does not describe the tumor relation to the serosa/peritoneal surface, and it cannot be determined whether the tumor arises in a peritonealized portion of the colon, use code 300. • Code 400 takes priority for peritonealized pericolic/perirectal tissues See definitions for code 300 and code 400 to determine coding for other structures such as fat, ligaments, and wall NOS. Use code 300 when there is no text available or the text does not provide the necessary information to make a consolidation decision.

Field dependencies: Primary Site [NAACCR #400]

Additional Input Tables

When the Source 1 EOD PT value is 000:

Source 2 Code(s)	Outcome
050	When histology is 8441/2 serous endometrial intraepithelial carcinoma (EIC), or 8380/2 Endometrial intraepithelial carcinoma (EID), use code 050. For other in situ histologies, use code 000.

Field dependencies: Histologic Type ICD-O-3 [NAACCR #522]

When the Source 1 EOD PT value is 000, 050:

Source 2 Code(s)	Outcome
100-999	When behavior = 2 (in situ), codes 000, 050 take priority When behavior = 3 (invasive), codes 100-999 take priority

Field dependencies: Behavior Code ICD-O-3 [NAACCR #523]

When the Source 1 EOD PT value is 300:

Source 2 Code(s)	Outcome
150, 250	Perform a **text review** to determine whether endocervical involvement is present. • When present, codes 150, 250 take priority. • When not present, cannot be determined from the text, or text is not available, use code 300.

When the Source 1 EOD PT value is 400:

Source 2 Code(s)	Outcome
100	Perform a **text review** to determine whether endocervical involvement is present. • When present, and both codes are true and valid, use code 150. • When not present, cannot be determined from the text, or text is not available, use code 100.
200	Perform a **text review** to determine whether endocervical involvement is present. • When present, and both codes are true and valid, use code 250. • When not present, cannot be determined from the text, or text is not available, use code 200.

Additional Input Tables

When the Source 1 EOD PT value is 000:

Source 2 Code(s)	Outcome
050	When histology is 8441/2 serous tubal intraepithelial carcinoma (STIC) and it is limited to one tube, use code 050. For other in situ histologies, use code 000.
070	When histology is 8441/2 serous tubal intraepithelial carcinoma (EIC) and both tubes are involved, use code 070. For other in situ histologies, use code 000.
080	When histology is 8441/2 serous tubal intraepithelial carcinoma (EIC) and it is unknown whether one or both tubes are involved, use code 080. For other in situ histologies, use code 000.

Field dependencies: Histologic Type ICD-O-3 [NAACCR #522]

When the Source 1 EOD PT value is 000, 050, 070, 080:

Source 2 Code(s)	Outcome
100-999	When behavior = 2 (in situ), codes 000, 050, 070, 080 take priority When behavior = 3 (invasive), codes 100-999 take priority

Field dependencies: Behavior Code ICD-O-3 [NAACCR #523]

Text review needed (see additional Input Tables below)

Additional Input Tables

When the Source 1 EOD PT value is 000:

Source 2 Code(s)	Outcome
100-999	When behavior = 2 (in situ), code 000 takes priority When behavior = 3 (invasive), codes 100-999 take priority

Field dependencies: Behavior Code ICD-O-3 [NAACCR #523]

When the Source 1 EOD PT value is 100, 200:

Source 2 Code(s)	Outcome
600	Perform a **text review** to determine whether both codes 100 and 200 are true and valid. • When both are true and valid, **AND** primary site = C340, C348, C349, use code 600. • Otherwise, use the code that best reflects the result of the text review. When there is no information in the text or text is not available, use the lower code.

Field dependencies: Primary Site [NAACCR #400]

When the Source 1 EOD PT value is 400:

Source 2 Code(s)	Outcome
600	Perform a **text review** to determine whether the carina is involved. • When the carina is involved, use code 650. • When the carina is not involved, there is no information in the text, or text is not available, use code 400.

Higher code is NOT the priority

Code combination results in a different code

Text review needed (see additional Input Tables below)

Additional Input Tables

When the Source 1 EOD PT value is 100, 300:

Source 2 Code(s)	Outcome
200, 400	Perform a **text review** to determine the sites of involvement (lymph node regions, extralymphatic site, or both). • When a single lymph node region is involved (AND primary site **IS** C024, C090-C099, C111, C142, C379, C422, C770-C779), code 100 • When a single extranodal region is involved (AND primary site **IS NOT** be C024, C090-C099, C111, C142, C379, C422, C770-C779), code 200 • When multiple lymph node regions are involved (AND primary site **IS** C024, C090-C099, C111, C142, C379, C422, C770-C779), code 300 • When both lymph node regions and extralymphatic sites are involved (any primary site), code 400

Additional Input Tables

When the Source 1 EOD RN value is 300:

Source 2 Code(s)	Outcome
400	Perform a **text review** to determine how many lymph node regions are involved. Multiple lymph nodes can be contained in a single region. • When a single region is involved, code 300 takes priority • When multiple regions are involved, code 400 takes priority • If there is no information in the text or text is not available, then use code 500

Plasma Cell Disorders

Additional Input Tables

When the Source 1 EOD RN value is 987:

Source 2 Code(s)	Outcome
000, 800	These codes are used with different histologies. Perform a **text review** to determine the correct histology for the case. • When histology is 9734, use code 000 or 800 • When histology is 9671, 9731, or 9761, use code 987

Field dependencies: Histologic Type ICD-O-3 [NAACCR #522]

Higher code is NOT the priority

Additional Input Tables (Prostate Path Extension)

When the Source 1 Prostate Path Extension value is 000:

Source 2 Code(s)	Outcome
300-800, 999	When in situ only is found on prostatectomy, code 000 takes priority. When invasive is found on prostatectomy, codes 300-800, 999 take priority
900, 950	When RX Summ--Surg Primary Site **is not** 30-80, then codes 900, 950 take priority. When RX Summ--Surg Primary Site **is** 30-80 and only in situ is found on prostatectomy, then code 000 takes priority.

Field dependencies: Behavior Code ICD-O-3 [NAACCR #523], RX Summ--Surg Prim Site [NAACCR #1290]

When the Source 1 Prostate Path Extension value is 300-800:

Source 2 Code(s)	Outcome
900, 950	When RX Summ--Surg Primary Site is 30-80, codes 300-800 take priority. Otherwise, codes 900 and 950 take priority.

Field dependencies: RX Summ--Surg Prim Site [NAACCR #1290]

When the Source 1 Prostate Path Extension value is 900:

Source 2 Code(s)	Outcome
950	When prostatectomy is performed in 2nd course of therapy, code 950 takes priority. Otherwise, code 900 takes priority.

Appendix: EOD 2018 Consolidation Logic

INTRODUCTION

Each section of the main EOD 2018 Consolidation Manual contains a code grid with consolidation decisions for every code combination. Some code combinations require additional information before a code can be selected; the logic for those situations is documented in the Additional Input tables. However, there are some code combinations that require no additional input AND the higher code does not take priority. This appendix documents the consolidation logic for those code combinations. Schemas are listed in alphabetical order.

Generally, most lower codes take priority over the following higher codes:

- EOD Primary Tumor 800 (No Evidence of Primary Tumor)
- EOD Primary Tumor 999 (Unknown; cannot be assessed; not documented; DCO)
- EOD Regional Nodes 800 (Nodes, NOS)
- EOD Regional Nodes 999 (Unknown; cannot be assessed; not documented; DCO)
- EOD Mets 99 (DCO)

Since the above situations occur in nearly every schema, they are not documented in the appendix.

Note: Please see the code grids for each schema to determine which codes take priority over the above codes.

The following schemas have no appendix logic:

Adnexa Uterine Other
Adrenal Gland
Anus
Bile Ducts Distal
Bile Ducts Intrahepatic
Bile Ducts Perihilar
Biliary Other
Brain
Buccal Mucosa
Cervical Lymph Nodes and Unknown Primary Tumor of the
    Head and Neck
CNS Other
Cutaneous Carcinoma of Head and Neck
Digestive Other
Endocrine Other
Eye Other
Genital Female Other
Genital Male Other
GIST
Gum
HemeRetic
Ill-Defined Other
Intracranial Gland
Lacrimal Gland
Lacrimal Sac
Larynx Other
Larynx Subglottic

Liver
Maxillary Sinus
Middle Ear
Mouth Other
Nasal Cavity and Ethmoid Sinus
Nasopharynx
Orbital Sarcoma
Palate Hard
Pancreas
Parathyroid
Pharynx Other
Plasma Cell Disorders
Plasma Cell Myeloma
Pleural Mesothelioma
Respiratory Other
Retroperitoneum
Sinus Other
Skin Other
Soft Tissue Other
Soft Tissue Rare
Soft Tissue Trunk and Extremities
Tongue Anterior
Trachea
Urethra
Urethra-Prostatic
Urinary Other
Vagina

AMPULLA OF VATER (SCHEMA ID: 00270)

Ampulla of Vater--EOD Primary Tumor

Code combination	Decision Logic
(100, 150) vs 200	Code 200 is an NOS code; therefore codes 100 and 150 take priority
(300-400) vs 500	Code 500 is an NOS code; therefore codes 300-400 take priority
450 vs (500, 600)	Use code 700 when code 450 and another code within (500, 600) are both true and valid. Code 700 is a combination code that captures the definitions of codes 450 and (500, 600).

APPENDIX (SCHEMA ID: 00190)

Appendix--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

BLADDER (SCHEMA ID: 00620)

Bladder--EOD Primary Tumor

Code combination	Decision Logic
(100, 130) vs 150	Code 150 is an NOS code; therefore codes 100 and 130 take priority
(200, 300) vs 370	Code 370 is an NOS code; therefore codes 200 and 300 take priority
(250, 350) vs 400	Code 400 is an NOS code; therefore codes 250 and 350 take priority
(450, 500) vs 550	Code 550 is an NOS code; therefore codes 450 and 500 take priority
(600-720) vs 750	Code 750 is an NOS code; therefore codes 600-720 take priority
650 vs 700	Use code 720 when both codes 650 and 700 are true and valid. Code 720 is a combination code that captures the definitions of codes 650 and 700.

Bladder--EOD Mets

Code combination	Decision Logic
(10, 50) vs 70	Code 70 is an NOS code; therefore codes 10 and 50 take priority

Bone Appendicular Skeleton (Schema ID: 00381)

Bone Appendicular Skeleton--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

Bone Pelvis (Schema ID: 00383)

Bone Pelvis--EOD Primary Tumor

Code combination	Decision Logic
(100-550) vs 600	Code 600 is an NOS code; therefore codes 100-550 take priority

Bone Pelvis--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

BONE SPINE (SCHEMA ID: 00382)

Bone Spine--EOD Primary Tumor

Code combination	Decision Logic
(100-400) vs 450	Code 450 is an NOS code; therefore codes 100-400 take priority
(650, 700) vs 750	Code 750 derives an NOS T category, therefore codes 650 and 700 take priority

Bone Spine--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

BREAST (SCHEMA ID: 00480)

Breast--EOD Primary Tumor

Code combination	Decision Logic
(450-600) vs 700	Code 700 is an NOS code; therefore codes 450-600 take priority

Breast--EOD Regional Nodes

Code combination	Decision Logic
030 vs 050	Code 030 reflects positive ITCs alone OR positive ITCs and positive RT-PCR. Code 050 reflects only positive RT-PCR with negative ITCs. Therefore, code 030 takes priority.
(030, 050) vs 070	Code 070 is an NOS code; therefore codes 030 and 050 take priority
100 vs 150	Code 100 is a pathologically confirmed code so it takes priority over code 150, a clinical assessment only code
300 vs (350, 400)	Code 300 takes priority. It is more important to capture pathologically confirmed internal mammary nodes than it is to capture fixed/matted axillary nodes or clinically confirmed internal mammary nodes
350 vs 400	Use code 600 when both codes 350 and 400 are true and valid. Code 600 is a combination code that captures the definitions of codes 350 and 400.

CERVIX 8TH (SCHEMA ID: 00520)

Cervix 8th--EOD Primary Tumor

Code combination	Decision Logic
(100, 150) vs 200	Code 200 is an NOS code; therefore codes 100 and 150 take priority
(400, 450) vs 500	Code 500 is an NOS code; therefore codes 400 and 450 take priority
(550, 600) vs 700	Code 700 is an NOS code; therefore codes 550 and 600 take priority

CERVIX 9TH (SCHEMA ID: 09520)

Cervix 9th--EOD Primary Tumor

Code combination	Decision Logic
(100, 150) vs 200	Code 200 is an NOS code; therefore codes 100 and 150 take priority
250 vs 300	Code 300 is an NOS code; therefore code 250 takes priority
(400, 450) vs 500	Code 500 is an NOS code; therefore codes 400 and 450 take priority
(550, 600) vs 700	Code 700 is an NOS code; therefore codes 550 and 600 take priority

Cervix 9th--EOD Regional Nodes

Code combination	Decision Logic
(100, 200) vs 300	Code 300 is an NOS code; therefore codes 100 and 200 take priority
(400, 500) vs 600	Code 600 is an NOS code; therefore codes 400 and 500 take priority

Cervix Sarcoma (Schema ID: 00952)

Cervix Sarcoma--EOD Primary Tumor

Code combination	Decision Logic
(300, 400) vs 500	Code 500 is an NOS code; therefore codes 300 and 400 take priority
(550, 600) vs 650	Code 650 is an NOS code; therefore codes 550 and 600 take priority

Colon and Rectum (Schema ID: 00200)

Colon and Rectum--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

Conjunctiva (Schema ID: 00650)

Conjunctiva--EOD Primary Tumor

Code combination	Decision Logic
(400-650) vs 700	Code 700 is an NOS code; therefore codes 400-650 take priority

CORPUS ADENOSARCOMA (SCHEMA ID: 00542)

Corpus Adenosarcoma--EOD Primary Tumor

Code combination	Decision Logic
(100, 150, 200) vs 300	Code 300 is an NOS code; therefore codes 100, 150, 200 take priority
(125, 175, 250) vs 350	Code 350 is an NOS code; therefore codes 125, 175, 250 take priority
(400, 450) vs 500	Code 500 is an NOS code; therefore codes 400 and 450 take priority
(550, 600) vs 650	Code 650 is an NOS code; therefore codes 550 and 600 take priority
(550–650) vs 700	Use code 750 when code 700 and another code within 550-650 are both true and valid. Code 750 is a combination code that captures the definitions of codes 700 and 550-650.

CORPUS CARCINOMA & CARCINOSARCOMA
(SCHEMA ID: 00530)

Corpus Carcinoma & Carcinosarcoma--EOD Primary Tumor

Code combination	Decision Logic
(100, 200) vs 300	Code 300 is an NOS code; therefore codes 100 and 200 take priority
(150, 250) vs 400	Code 400 is an NOS code; therefore codes 150 and 250 take priority
(550, 600) vs 650	Code 650 is an NOS code; therefore codes 550 and 600 take priority
700 vs 750	Code 750 is an NOS code; therefore code 700 takes priority

Corpus Carcinoma & Carcinosarcoma--EOD Regional Nodes

Code combination	Decision Logic
(100, 200) vs 300	Code 300 is an NOS code; therefore codes 100 and 200 take priority
(400, 500) vs 600	Code 600 is an NOS code; therefore codes 400 and 500 take priority

CORPUS SARCOMA (SCHEMA ID: 00541)

Corpus Sarcoma--EOD Primary Tumor

Code combination	Decision Logic
(400, 450) vs 500	Code 500 is an NOS code; therefore codes 400 and 450 take priority
(550, 600) vs 650	Code 650 is an NOS code; therefore codes 550 and 600 take priority
(550–650) vs 700	Use code 750 when code 700 and a code within the range 550-650 are both true and valid. Code 750 is a combination code that captures the definitions of codes 700 and 550-650.

CYSTIC DUCT (SCHEMA ID: 00242)

Cystic Duct--EOD Primary Tumor

Code combination	Decision Logic
(100, 200) vs 300	Code 300 is an NOS code; therefore codes 100 and 200 take priority
(400, 450) vs 500	Code 500 is an NOS code; therefore codes 400 and 450 take priority
(150, 250, 400-500) vs 550	Use code 600 when code 550 and another code within (150, 250, 400-500) are both true and valid. Code 600 is a combination code that captures the definitions of code 550 and (150, 250, 400-500).

Esophagus (including GE junction) (excluding Squamous) (Schema ID: 00169)

Esophagus (excluding Squamous)--EOD Primary Tumor

Code combination	Decision Logic
(100, 150) vs 200	Code 200 is an NOS code; therefore codes 100 and 150 take priority
500 vs 600	Use code 700 when both codes 500 and 600 are true and valid. Code 700 is a combination code that captures the definitions of codes 500 and 600.

Esophagus (including GE junction) Squamous (Schema ID: 00161)

Esophagus (Squamous)--EOD Primary Tumor

Code combination	Decision Logic
(100, 150) vs 200	Code 200 is an NOS code; therefore codes 100 and 150 take priority
500 vs 600	Use code 700 when both codes 500 and 600 are true and valid. Code 700 is a combination code that captures the definitions of codes 500 and 600.

FALLOPIAN TUBE (SCHEMA ID: 00553)

Fallopian Tube--EOD Primary Tumor

Code combination	Decision Logic
(050, 070) vs 080	Code 080 is an NOS code; therefore codes 050 and 070 take priority
(100-300) vs 350	Code 350 is an NOS code; therefore codes 100-300 take priority
(400, 450) vs 500	Code 500 is an NOS code; therefore codes 400 and 450 take priority
(600-700) vs 750	Code 750 is an NOS code; therefore codes 600-700 take priority

Fallopian Tube--EOD Regional Nodes

Code combination	Decision Logic
(300, 400) vs 500	Code 500 is an NOS code; therefore codes 300 and 400 take priority

Fallopian Tube--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

FLOOR OF MOUTH (SCHEMA ID: 00074)

Floor of Mouth--EOD Primary Tumor

Code combination	Decision Logic
(300-500) vs 550	Use code 600 when code 550 and another code within 300-500 are both true and valid. Code 600 is a combination code that captures the definitions of code 550 and 300-500.

GALLBLADDER (SCHEMA ID: 00241)

Gallbladder--EOD Primary Tumor

Code combination	Decision Logic
(100-200) vs 300	Code 300 is an NOS code; therefore codes 100-200 take priority
(400, 450) vs 500	Code 500 is an NOS code; therefore codes 400 and 450 take priority

HEART, MEDIASTINUM AND PLEURA (SCHEMA ID: 00422)

Heart, Mediastinum and Pleura--EOD Primary Tumor

Code combination	Decision Logic
(200, 300) vs 400	Code 400 is an NOS code; therefore codes 200 and 300 take priority
(550-650) vs 700	Code 700 is an NOS code; therefore codes 550-650 take priority

HYPOPHARYNX (SCHEMA ID: 00112)

Hypopharynx--EOD Primary Tumor

Code combination	Decision Logic
500 vs 600	Use code 700 when both codes 500 and 600 are true and valid. Code 700 is a combination code that captures the definitions of codes 500 and 600.

KAPOSI SARCOMA (SCHEMA ID: 00458)

Kaposi Sarcoma--EOD Primary Tumor

Code combination	Decision Logic
(200-600) vs 700	Code 700 is an NOS code; therefore codes 200-600 take priority

Kaposi Sarcoma--EOD Regional Nodes

Code combination	Decision Logic
100 vs 200	Use code 300 when both codes 100 and 200 are true and valid. Code 300 is a combination code that captures the definitions of codes 100 and 200.

KIDNEY PARENCHYMA (SCHEMA ID: 00600)

Kidney Parenchyma--EOD Primary Tumor

Code combination	Decision Logic
(200-400) vs 500	Code 500 is an NOS code; therefore codes 200-400 take priority

KIDNEY RENAL PELVIS (SCHEMA ID: 00610)

Kidney Renal Pelvis--EOD Primary Tumor

Code combination	Decision Logic
200 vs 300	Use code 400 when both codes 200 and 300 are true and valid. Code 400 is a combination code that captures the definitions of codes 200 and 300.

LARYNX GLOTTIC (SCHEMA ID: 00132)

Larynx Glottic--EOD Primary Tumor

Code combination	Decision Logic
(100, 150) vs 200	Code 200 is an NOS code; therefore codes 100 and 150 take priority

LARYNX SUPRAGLOTTIC (SCHEMA ID: 00131)

Larynx Supraglottic--EOD Primary Tumor

Code combination	Decision Logic
250 vs 300	Use code 400 when both codes 250 and 300 are true and valid. Code 400 is a combination code that captures the definitions of codes 250 and 300.
450 vs 500	Use code 600 when both codes 450 and 500 are true and valid. Code 600 is a combination code that captures the definitions of codes 450 and 500.

LIP (SCHEMA ID: 00071)

Lip--EOD Primary Tumor

Code combination	Decision Logic
600 vs 650	Use code 700 when both codes 600 and 650 and true and valid. Code 700 is a combination code that captures the definitions of codes 600 and 650.

LUNG (SCHEMA ID: 00360)

Lung--EOD Primary Tumor

Code combination	Decision Logic
(300, 450, 500) vs 600	Use code 650 when code 600 and another code within (300, 450, 500) are both true and valid. Code 650 is a combination code that captures the definitions of code 600 and (300, 450, 500).
(100-700) vs 980	Code 980 indicates an occult carcinoma, therefore all codes except for code 800 (no evidence of tumor) take priority

Lung--EOD Mets

Code combination	Decision Logic
20 vs 30	Use code 50 when both codes 20 and 30 are true and valid. Code 50 is a combination code that captures the definitions of codes 20 and 30.
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

LYMPHOMA (SCHEMA ID: 00790)

Lymphoma--EOD Primary Tumor

Code combination	Decision Logic
(100-700) vs 750	Use code 800 when code 750 and another code within 100-700 are both true and valid. Code 800 is a combination code that captures the definitions of codes 750 and 100-700.

LYMPHOMA OCULAR ADNEXA (SCHEMA ID: 00710)

Lymphoma Ocular Adnexa--EOD Primary Tumor

Code combination	Decision Logic
100 vs 200	Code 200 is an NOS code; therefore code 100 takes priority

Lymphoma Ocular Adnexa--EOD Regional Nodes

Code combination	Decision Logic
(300, 400) vs 500	Code 500 is an NOS code; therefore codes 300 and 400 take priority

Lymphoma Ocular Adnexa--EOD Mets

Code combination	Decision Logic
10 vs 30	Use code 50 when both codes 10 and 30 are true and valid. Code 50 is a combination code that captures the definitions of codes 10 and 30.
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

LYMPHOMA CLL/SLL (SCHEMA ID: 00795)

Lymphoma CLL/SLL--EOD Primary Tumor

Code combination	Decision Logic
(100-700) vs 750	Use code 800 when code 750 and another code within 100-700 are both true and valid. Code 800 is a combination code that captures the definitions of codes 750 and 100-700.

MAJOR SALIVARY GLANDS (SCHEMA ID: 00080)

Major Salivary Glands--EOD Primary Tumor

Code combination	Decision Logic
350 vs 400	Use code 500 when both codes 350 and 400 are true and valid. Code 500 is a combination code that captures the definitions of codes 350 and 400.
(350, 500) vs 600	Use code 700 when both codes 600 and (350 or 500) are true and valid. Code 700 is a combination code that captures the definitions of codes 600 and (350 or 500).

MELANOMA CHOROID AND CILIARY BODY (SCHEMA ID: 00672)

Melanoma Choroid and Ciliary Body--EOD Primary Tumor

Code combination	Decision Logic
600 vs 700	Code 700 is an NOS code; therefore code 600 takes priority

Melanoma Choroid and Ciliary Body--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

MELANOMA CONJUNCTIVA (SCHEMA ID: 00660)

Melanoma Conjunctiva--EOD Primary Tumor

Code combination	Decision Logic
(100-130) vs 150	Code 150 is an NOS code; therefore codes 100-130 take priority
(200-350) vs 400	Code 400 is an NOS code; therefore codes 200-350 take priority
(450-650) vs 700	Code 700 is an NOS code; therefore codes 450-650 take priority

MELANOMA HEAD AND NECK (SCHEMA ID: 00140)

Melanoma Head and Neck--EOD Primary Tumor

Code combination	Decision Logic
(300-600) vs 700	Code 700 is an NOS code; therefore codes 300-600 take priority

MELANOMA IRIS (SCHEMA ID: 00671)

Melanoma Iris--EOD Primary Tumor

Code combination	Decision Logic
(100-200) vs 250	Code 250 is an NOS code; therefore codes 100-200 take priority
(300-400) vs 450	Code 450 is an NOS code; therefore codes 300-400 take priority
(550, 600) vs (650, 700)	Codes 650 and 700 are NOS codes; therefore codes 550 and 600 take priority

Melanoma Iris--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

MELANOMA SKIN (SCHEMA ID: 00470)

Melanoma Skin--EOD Primary Tumor

Code combination	Decision Logic
(100-300) vs 400	Code 400 is an NOS code; therefore codes 100-300 take priority

Melanoma Skin--EOD Regional Nodes

Code combination	Decision Logic
(100, 200) vs 350	Code 350 is an NOS code; therefore codes 100 and 200 take priority
(400, 450) vs 550	Code 550 is an NOS code; therefore codes 400 and 450 take priority
(600, 650) vs 750	Code 750 is an NOS code; therefore codes 600 and 650 take priority

Melanoma Skin--EOD Mets

Code combination	Decision Logic
(10-60) vs 70	Code 70 is an NOS code; therefore codes 10-60 take priority

MERKEL CELL SKIN (SCHEMA ID: 00460)

Merkel Cell Skin--EOD Regional Nodes

Code combination	Decision Logic
(300-400) vs 500	Code 500 is an NOS code; therefore codes 300-400 take priority

Merkel Cell Skin--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

MYCOSIS FUNGOIDES (SCHEMA ID: 00811)

Mycosis Fungoides--EOD Primary Tumor

Code combination	Decision Logic
(100, 150) vs 200	Code 200 is an NOS code; therefore codes 100 and 150 take priority
(250, 300) vs 400	Code 400 is an NOS code; therefore codes 250 and 300 take priority

Mycosis Fungoides--EOD Regional Nodes

Code combination	Decision Logic
(100, 200) vs 300	Code 300 is an NOS code; therefore codes 100 and 200 take priority
(400, 500) vs 600	Code 600 is an NOS code; therefore codes 400 and 500 take priority

NET ADRENAL GLAND (SCHEMA ID: 00770)

NET Adrenal Gland--EOD Mets

Code combination	Decision Logic
10 vs (20, 30)	Use code 50 when both codes 10 and (20 or 30) are true and valid. Code 50 is a combination code that captures the definitions of codes 10 and (20 or 30).
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

NET AMPULLA OF VATER (SCHEMA ID: 00302)

NET Ampulla of Vater--EOD Primary Tumor

Code combination	Decision Logic
500 vs 600	Code 500 maps to Distant in SS2018, while code 600 maps to Regional; therefore, code 500 takes priority.

NET Ampulla of Vater--EOD Mets

Code combination	Decision Logic
10 vs (20, 30)	Use code 50 when both codes 10 and (20 or 30) are true and valid. Code 50 is a combination code that captures the definitions of codes 10 and (20 or 30).
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

NET APPENDIX (SCHEMA ID: 00320)

NET Appendix--EOD Mets

Code combination	Decision Logic
10 vs (20, 30)	Use code 50 when both codes 10 and (20 or 30) are true and valid. Code 50 is a combination code that captures the definitions of codes 10 and (20 or 30).
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

NET Colon and Rectum (Schema ID: 00330)

NET Colon and Rectum--EOD Mets

Code combination	Decision Logic
10 vs (20, 30)	Use code 50 when both codes 10 and (20 or 30) are true and valid. Code 50 is a combination code that captures the definitions of codes 10 and (20 or 30).
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

NET Duodenum (Schema ID: 00301)

NET Duodenum--EOD Mets

Code combination	Decision Logic
10 vs (20, 30)	Use code 50 when both codes 10 and (20 or 30) are true and valid. Code 50 is a combination code that captures the definitions of codes 10 and (20 or 30).
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

NET Jejunum and Ileum (Schema ID: 00310)

NET Jejunum and Ileum--EOD Mets

Code combination	Decision Logic
10 vs (20, 30)	Use code 50 when both codes 10 and (20 or 30) are true and valid. Code 50 is a combination code that captures the definitions of codes 10 and (20 or 30).
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

NET Pancreas (Schema ID: 00340)

NET Pancreas--EOD Mets

Code combination	Decision Logic
10 vs (20, 40, 50)	Use code 60 when both codes 10 and another code within (20, 40, 50) are true and valid. Code 60 is a combination code that captures the definitions of codes 10 and (20, 40, 50).
(10-60) vs 70	Code 70 is an NOS code; therefore codes 10-60 take priority

NET STOMACH (SCHEMA ID: 00290)

NET Stomach--EOD Mets

Code combination	Decision Logic
10 vs (20, 30)	Use code 50 when both codes 10 and (20 or 30) are true and valid. Code 50 is a combination code that captures the definitions of codes 10 and (20 or 30).
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

OROPHARYNX (P16-) (SCHEMA ID: 00111)

Oropharynx (p16-)--EOD Primary Tumor

Code combination	Decision Logic
200 vs 300	Use code 400 when both codes 200 and 300 are true and valid. Code 400 is a combination code that captures the definitions of codes 200 and 300.
550 vs 600	Use code 700 when both codes 550 and 600 are true and valid. Code 700 is a combination code that captures the definitions of codes 550 and 600.

OROPHARYNX HPV-MEDIATED (P16+) (SCHEMA ID: 00100)

Oropharynx HPV-Mediated (p16+)--EOD Primary Tumor

Code combination	Decision Logic
200 vs 300	Use code 400 when both codes 200 and 300 are true and valid. Code 400 is a combination code that captures the definitions of codes 200 and 300.

OVARY (SCHEMA ID: 00551)

Ovary--EOD Primary Tumor

Code combination	Decision Logic
(100-300) vs 350	Code 350 is an NOS code; therefore codes 100-300 take priority
(400, 450) vs 500	Code 500 is an NOS code; therefore codes 400 and 450 take priority
(600-700) vs 750	Code 750 is an NOS code; therefore codes 600-700 take priority

Ovary--EOD Regional Nodes

Code combination	Decision Logic
(300, 400) vs 500	Code 500 is an NOS code; therefore codes 300 and 400 take priority

Ovary--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

PENIS (SCHEMA ID: 00570)

Penis--EOD Primary Tumor

Code combination	Decision Logic
(100-200) vs 300	Code 300 is an NOS code; therefore codes 100-200 take priority

PLACENTA (SCHEMA ID: 00560)

Placenta--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

PRIMARY CUTANEOUS LYMPHOMA
(SCHEMA ID: 00812)

Primary Cutaneous Lymphoma--EOD Primary Tumor

Code combination	Decision Logic
(400, 500) vs 600	Code 600 is an NOS code; therefore codes 400 and 500 take priority

PRIMARY PERITONEAL CARCINOMA
(SCHEMA ID: 00552)

Primary Peritoneal Carcinoma--EOD Primary Tumor

Code combination	Decision Logic
(600-700) vs 750	Code 750 is an NOS code; therefore codes 600-700 take priority

Primary Peritoneal Carcinoma--EOD Regional Nodes

Code combination	Decision Logic
(300, 400) vs 500	Code 500 is an NOS code; therefore codes 300 and 400 take priority

Primary Peritoneal Carcinoma--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

PROSTATE (SCHEMA ID: 00580)

Prostate--EOD Primary Tumor

Code combination	Decision Logic
(200-220) vs 250	Code 250 is an NOS code; therefore codes 200-220 take priority
(100-250) vs 300	Code 300 is an NOS code; therefore codes 100-250 take priority
(350, 400) vs 500	Code 500 is an NOS code; therefore codes 350-400 take priority

Prostate--Prostate Pathological Extension

Code combination	Decision Logic
(300-700) vs 800	Code 800 indicates that there is no evidence of primary tumor. Therefore, all lower codes (except for 000) take priority

Prostate--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

RETINOBLASTOMA (SCHEMA ID: 00680)

Retinoblastoma--EOD Primary Tumor

Code combination	Decision Logic
(100, 125) vs 150	Code 150 is an NOS code; therefore codes 100 and 125 take priority
(200-275) vs 300	Code 300 is an NOS code; therefore codes 200-275 take priority
(325-525) vs 550	Code 550 is an NOS code; therefore codes 325-525 take priority
(600, 650) vs 700	Code 700 is an NOS code; therefore codes 600 and 650 take priority

Retinoblastoma--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

SKIN OF EYELID (SCHEMA ID: 00640)

Skin of Eyelid--EOD Primary Tumor

Code combination	Decision Logic
(400-600) vs 700	Code 700 is an NOS code; therefore codes 400-600 take priority

Skin of Eyelid--EOD Regional Nodes

Code combination	Decision Logic
(100, 200) vs 300	Code 300 is an NOS code; therefore codes 100 and 200 take priority
(400, 500) vs 600	Code 600 is an NOS code; therefore codes 400 and 500 take priority

SMALL INTESTINE (SCHEMA ID: 00180)

Small Intestine--EOD Primary Tumor

Code combination	Decision Logic
(100, 200) vs 250	Code 250 is an NOS code; therefore codes 100 and 200 take priority

Soft Tissue Abdomen and Thoracic (Schema ID: 00421)

Soft Tissue Abdomen and Thoracic--EOD Primary Tumor

Code combination	Decision Logic
(200, 300) vs 400	Code 400 is an NOS code; therefore codes 200 and 300 take priority
(550-650) vs 700	Code 700 is an NOS code; therefore codes 550-650 take priority

Soft Tissue Head and Neck (Schema ID: 00400)

Soft Tissue Head and Neck--EOD Primary Tumor

Code combination	Decision Logic
(500, 600) vs 700	Code 700 is an NOS code; therefore codes 500 and 600 take priority

Stomach (Schema ID: 00170)

Stomach--EOD Primary Tumor

Code combination	Decision Logic
(100, 200) vs 300	Code 300 is an NOS code; therefore codes 100 and 200 take priority

TESTIS (SCHEMA ID: 00590)

Testis--EOD Mets

Code combination	Decision Logic
(10-60) vs 70	Code 70 is an NOS code; therefore codes 10-60 take priority

THYMUS (SCHEMA ID: 00350)

Thymus--EOD Primary Tumor

Code combination	Decision Logic
(100, 200) vs 300	Code 300 is an NOS code; therefore codes 100 and 200 take priority

Thymus--EOD Mets

Code combination	Decision Logic
(10-50) vs 70	Code 70 is an NOS code; therefore codes 10-50 take priority

THYROID (SCHEMA ID: 00730)

Thyroid--EOD Primary Tumor

Code combination	Decision Logic
(400-700) vs 750	Code 750 is an NOS code; therefore codes 400-700 take priority

Thyroid--EOD Regional Nodes

Code combination	Decision Logic
(000, 050) vs 070	Code 070 is an NOS code; therefore codes 000 and 050 take priority

THYROID MEDULLARY (SCHEMA ID: 00740)

Thyroid Medullary--EOD Primary Tumor

Code combination	Decision Logic
(400-700) vs 750	Code 750 is an NOS code; therefore codes 400-700 take priority

Thyroid Medullary--EOD Regional Nodes

Code combination	Decision Logic
(000, 050) vs 070	Code 070 is an NOS code; therefore codes 000 and 050 take priority

VULVA (SCHEMA ID: 00500)

Vulva--EOD Primary Tumor

Code combination	Decision Logic
100 vs 150	Code 150 is an NOS code; therefore code 100 takes priority
200 vs 250	Code 250 is an NOS code; therefore code 200 takes priority
(200, 250) vs 300	Codes 200 and 250 map to Regional in SS2018, while code 300 maps to Localized; therefore codes 200 and 250 take priority.

Vulva--EOD Regional Nodes

Code combination	Decision Logic
(100, 200) vs 300	Code 300 is an NOS code; therefore codes 100 and 200 take priority
(400-600) vs 700	Code 700 is an NOS code; therefore codes 400-600 take priority
